## NOTE TO CATV INSTALLERS IN THE USA

This is a reminder to call the CATV system installer's attention to Article 820-40 of the NEC, which provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building, as close to the point of cable entry as practical. For additional antenna grounding information, see items 25 and 26 on page 4.

## NOTICE OF POSSIBLE TV STAND INSTABILITY

DANGER: RISK OF SERIOUS PERSONAL INJURY OR DEATH! Use this TV with the TOSHIBA TV stand recommended in the "Specifications" section only. Use with other stands may result in instability, causing possible injury or death.

## NOTICE OF POSSIBLE ADVERSE EFFECTS ON TV PICTURE TUBE

If a fixed (non-moving) pattern remains on the TV screen for long periods of time, the image can become permanently engrained in the picture tube. **This type of damage is NOT COVERED BY YOUR WARRANTY.** See item 33 on page 4.

## **Child Safety**

## It Makes A Difference Where Your TV Stands

Congratulations on your purchase! As you enjoy your new TV, keep these safety tips in mind:

## The Issue

- ☐ If you are like most Americans, you have a TV in your home. Many homes, in fact, have more than one TV.
- ☐ The home theater entertainment experience is a growing trend, and larger TVs are popular purchases; however, they are not always supported on the proper TV stands.
- ☐ Sometimes TVs are improperly secured or inappropriately situated on dressers, bookcases, shelves, desks, audio speakers, chests, or carts. As a result, TVs may fall over, causing unnecessary injury.

**Toshiba Cares!** 

☐ The consumer electronics industry is committed to making home entertainment enjoyable and safe.

☐ The Consumer Electronics
Association formed the Home
Entertainment Support Safety
Committee, comprised of TV and
consumer electronics furniture
manufacturers, to advocate
children's safety and educate
consumers and their families about
television safety.

## **Tune Into Safety**

☐ One size does NOT fit all! Use appropriate furniture large enough to support the weight of your TV (and other electronic components).

- ☐ Use appropriate angle braces, straps, and anchors to secure your furniture to the wall (but never screw anything directly into the TV).
- ☐ Carefully read and understand the other enclosed instructions for proper use of this product.
- Do not allow children to climb on or play with furniture and TVs.
- Avoid placing any item on top of your TV (such as a VCR, remote control, or toy) that a curious child may reach for.
- ☐ Remember that children can become excited while watching a program and can potentially push or pull a TV over.
- ☐ Share our safety message about this hidden hazard of the home with your family and friends. Thank you!

## **Important Safety Instructions**

- 1) Read these instructions.
- 2) Keep these instructions.
- 3) Heed all warnings.
- 4) Follow all instructions.

5) Do not use this apparatus near water.

- 6) Clean only with a dry cloth.
- Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.

- 9) **Do not defeat the safety purpose of the polarized or grounding type plug.** A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding
  - prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.

10) Protect the power cord from being walked on or pinched, particularly at plugs, convenience receptacles, and the point where it exits the apparatus.

- Only use attachments/accessories specified by the manufacturer.
- 12) Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.

 Unplug this apparatus during lightning storms or when unused for long periods of time.

- 14) Refer all servicing to qualified service personnel.

  Servicing is required when the apparatus has been damaged in any way, such as power supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
- 15) CAUTION: To reduce the risk of electric shock, do not use the polarized plug with an extension cord, receptacle, or other outlet unless the blades can be inserted completely to prevent blade exposure.

## **Installation, Care, and Service**

## Installation

Follow these recommendations and precautions and heed all warnings when installing your TV:

16) Never modify this equipment. Changes or modifications may void: a) the warranty, and b) the user's authority to operate this equipment under the rules of the Federal Communications Commission.

DANGER: RISK OF SERIOUS PERSONAL INJURY, DEATH, OR EQUIPMENT DAMAGE! Never place the TV on an unstable cart, stand, or table. The TV may fall, causing serious personal injury, death, or serious damage to the TV.

18) Never place or store the TV in direct sunlight; hot, humid areas; areas subject to excessive dust or vibration; or locations with temperatures at or below 41°F (5°C).

19) Always place the TV on the floor or a sturdy, level, stable surface that can support the weight of the unit.

Never place items such as vases, aquariums, or candles on top of the TV.

- 21) Never block or cover the slots or openings in the TV cabinet back, bottom, and sides. Never place the TV:
  - on a bed, sofa, rug, or similar surface;
  - too close to drapes, curtains, or walls; or
  - in a confined space such as a bookcase, built-in cabinet, or any other place with poor ventilation.

The slots and openings are provided to protect the TV from overheating and to help maintain reliable operation of the TV.

- 22) Never allow anything to rest on or roll over the power cord, and never place the TV where the power cord is subject to wear or abuse.
- Never overload wall outlets and extension cords.

24) Always operate this equipment from a 120 VAC, 60 Hz power source only.

25) Always make sure the antenna system is properly grounded to provide adequate protection against voltage surges and built-up static charges (see Section 810 of the National Electric Code).

## DANGER: RISK OF SERIOUS PERSONAL INJURY OR DEATH!

- Use extreme care to make sure you are never in a position where your body (or any item you are in contact with, such as a ladder or screwdriver) can accidentally touch overhead power lines. Never locate the antenna near overhead power lines or other electrical circuits.
- Never attempt to install any of the following during lightning activity:
- a) an antenna system; or b) cables, wires, or any home theater component connected to an antenna or phone system.

### Care

26)

For better performance and safer operation of your TOSHIBA TV, follow these recommendations and precautions:

- 27) Always sit approximately 10–25 feet away from the TV and as directly in front of it as possible. The picture can appear dull if you sit too far to the left or right of the TV, or if sunlight or room lights reflect on the screen. Turn the TV off to check for reflections on the screen, and then remove the source of reflections while viewing the TV.
- 28) Always unplug the TV before cleaning. Never use liquid or aerosol cleaners.

29) WARNING: RISK OF ELECTRIC SHOCK!

Never spill liquids or push objects of any kind into the TV cabinet slots.

- 30) [This item applies to projection TVs only.] If the air temperature rises suddenly (for example, when the TV is first delivered), condensation may form on the lenses. This can make the picture appear distorted or the color appear faded. If this happens, turn off the TV for 6 to 7 hours to allow the condensation to evaporate.
- 31) For added protection of your TV from lightning and power surges, always unplug the power cord and disconnect the antenna from the TV if you leave the TV unattended or unused for long periods of time.
- 32) During normal use, the TV may make occasional snapping or popping sounds. This is normal, especially when the unit is being turned on or off. If these sounds become frequent or continuous, unplug the power cord and contact a Toshiba Authorized Service Center.
- 33) Possible Adverse Effects on TV Picture Tube: If a fixed (non-moving) pattern remains on the TV screen for long periods of time, the image can become permanently engrained in the picture tube and cause subtle but permanent ghost images. This type of damage is NOT COVERED BY YOUR WARRANTY. Never leave your TV on for long periods of time while it is displaying the following formats or images:
  - **Fixed Images**, such as PIP/POP windows, stock tickers, video game patterns, TV station logos, and websites.
  - Special Formats that do not use the entire screen. For example, viewing letterbox style (16:9) media on a normal (4:3) display (gray bars at top and bottom of screen); or viewing normal style (4:3) media on a widescreen (16:9) display (gray bars on left and right sides of screen).

## **Service**

WARNING: RISK OF ELECTRIC
SHOCK! Never attempt to service the
TV yourself. Opening and
removing the covers may expose
you to dangerous voltage or other
hazards. Refer all servicing to a
Toshiba Authorized Service Center.

35) If you have the TV serviced:

• Ask the service technician to use only replacement parts specified by the manufacturer.

ONLY AUTHORIZED REPLACEMENT PARTS!

 Upon completion of service, ask the service technician to perform routine safety checks to determine that the TV is in safe operating condition.

36) When the TV reaches the end of its useful life, ask a qualified service technician to properly dispose of the TV. Improper disposal may result in a picture tube implosion and possible personal injury.

## Introduction

- This owner's manual applies to models 32A33, 32A43, and 36A43, and there are slight differences among them.
- Model 32A43 is used in this manual for illustration purposes.
- Instructions in this manual are based on using the remote control; however, you can use the buttons on the front panel of the TV if they have the same name as those referred to on the remote control.
- Check the model number on the back of your TV before using this manual. Write your model and serial numbers in the space provided on the front cover of this manual for your records.

## **Exploring your new TV**

- You can operate your TV using the buttons on the front panel or remote control.
- The back panel provides all the inputs you will need to connect other equipment to your TV. Models 32A43 and 36A43 have additional audio/video inputs on the front panel (referred to as "VIDEO-3").

<sup>\*</sup>If you use an S-Video cable with a VIDEO-1 connection or a set of component video cables with a VIDEO-2 connection, you will need to disconnect the respective standard video cable or the picture performance will be unacceptable.

## **Selecting a location for your TV**

- Place the TV either on the floor or on the TV stand listed in the "Specifications" section.
- Place the TV in a location where light does not directly hit the screen.
- Place the TV far enough from the walls to allow proper ventilation. Inadequate ventilation may cause overheating, which can damage the TV.

Before installing your TV, please read the important safety information on pages 2–4.

## Connecting your TV

**Note:** Cables are not supplied with your TV.

- Coaxial cable is the cable that comes in from your antenna, cable TV service, or cable converter box. Coaxial cable uses "F" connectors.
- Standard stereo A/V cables usually come in sets of three, and are typically color-coded according to use: yellow for video, red for stereo right audio, and white for stereo left (or mono) audio. Your TV's standard A/V inputs are color-coded in the same manner as the cables.
- S-Video cable is for use with video equipment that has S-Video connectors.
- Component video cables come in sets of three (typically color-coded green, blue, and red), and are for use with video equipment that has component video connectors. Your TV's ColorStream® (component video) inputs are color-coded yellow, blue, and red. Plug the green component video cable into the yellow VIDEO-2 input (see "Back of TV" on page 6).

## **NOTE REGARDING PICTURE QUALITY**

When connecting video equipment to your Toshiba TV:

- For GOOD picture quality: Use a standard yellow video cable.
- For BETTER picture quality: If your equipment has S-video connectors, use an S-video cable instead of a standard yellow video cable. You still must connect the standard red and white audio cables for full system connection, but do not connect a standard yellow video cable at the same time or the picture performance will be unacceptable.
- For BEST picture quality: If your equipment has component video connectors, use component video cables instead of a standard yellow video cable or S-video cable. You still must connect the standard red and white audio cables for full system connection.

**CAUTION:** Do not plug in any power cords until you have finished connecting all equipment.

## Connecting a VCR

## With this connection you can:

- · watch local TV channels and videotapes
- record one channel while watching the same or another channel

#### You will need:

- two coaxial cables
- one set of standard A/V cables (If your VCR has S-video, you can use an S-video cable instead of the standard video cable. See "Note Regarding Picture Quality" above.)

#### Note:

If you have a mono VCR, connect L/Mono to VCR Audio OUT using only one audio cable.

The VIDEO-2 inputs on the back of the TV can be used for connecting a second piece of video equipment such as a DVD player. The VIDEO-3 inputs\* on the front of the TV can be used for connecting a third piece of video equipment such as a camcorder. See "Note Regarding Picture Quality" above.

\*Model 32A33 does not have VIDEO 3 inputs.

## **Connecting a cable converter box**

## With this connection you can:

· watch basic and premium cable channels

Tune the TV to channel 3 or 4 (whichever channel is vacant in your area), and then use the cable converter box to change channels.

### You will need:

• two coaxial cables

#### Note:

When you use a cable converter box with your TV, you may not be able to use the remote control to program certain features (for example, blocking channels).

The unauthorized recording, use, distribution, or revision of television programs, videotapes, DVDs, and other materials is prohibited under the Copyright Laws of the United States and other countries, and may subject you to civil and criminal liability.

## Connecting a cable converter box and a VCR

### With this connection you can:

- watch videotapes
- watch and record basic and premium cable channels
- record one channel while watching the same or another non-premium channel

Tune the VCR to channel 3 or 4 (whichever channel is vacant in your area), place the TV in VIDEO 1 mode, and then use the converter box to change channels.

#### You will need:

- one cable signal splitter
- · four coaxial cables
- one set of standard A/V cables (If your VCR has S-video, you can use an S-video cable instead of the standard video cable. See "Note Regarding Picture Quality" on page 7.)

If you have a mono VCR, connect TV L/Mono Audio IN to VCR Audio OUT using only one audio cable.

When you use a cable converter box with your TV, you may not be able to use the remote control to program certain features (for example, blocking channels).

The unauthorized recording, use, distribution, or revision of television programs, videotapes, DVDs, and other materials is prohibited under the Copyright Laws of the United States and other countries, and may subject you to civil and criminal liability.

## Connecting a satellite receiver and a VCR

## With this connection you can:

- · watch videotapes
- watch satellite and TV channels

#### You will need:

- · three coaxial cables
- two sets of standard A/V cables (If your satellite receiver has S-video, you can use an S-video cable from the satellite receiver instead of the standard video cable. See "Note Regarding Picture Quality" on page 7.)

#### Note:

To watch satellite programs, the TV must select VIDEO-1 (see "Selecting the signal source" on page 16).

To watch VCR programs, the TV must select VIDEO-2 (see "Selecting the signal source" on page 16).

## Connecting a DVD player with ColorStream® (component video) and a VCR

Your TV has ColorStream® (component video) inputs. Connecting your TV to a DVD player with component video (such as a Toshiba DVD player with ColorStream®) can greatly enhance picture quality and performance.

### With this connection you can:

- watch TV channels, DVDs, and videotapes
- · record TV channels
- record one channel while watching the same or another channel

#### You will need:

- · two coaxial cables
- one set of standard A/V cables from the VCR (If your VCR has S-video, you can use an S-video cable instead of the standard video cable. See "Note Regarding Picture Quality" on page 7.)
- one set of component video cables from the DVD player
- one pair of standard audio cables from the DVD player

#### Note:

To watch the VCR, the TV must select VIDEO 1 (see page 16). To watch the DVD player, the TV must select VIDEO 2 (see "Selecting the signal source" on page 16).

The ColorStream inputs on the TV are for use with DVD players with 480i interlaced scanning only. If you have a 480p progressive scan DVD player, you must switch the DVD player to 480i interlaced mode first, and then connect it to the TV's ColorStream inputs. Failure to do this will cause a poor picture or no picture to display.

You can connect a high-definition set-top receiver only if the output is switched to 480i interlaced mode first. **This TV will not accept or display 480p or 720p progressive scan signals or 1080i interlaced high-definition signals.** 

## 

DVD player with component video

The unauthorized recording, use, distribution, or revision of television programs, videotapes, DVDs, and other materials is prohibited under the Copyright Laws of the United States and other countries, and may subject you to civil and criminal liability.

## **Connecting two VCRs**

## With this connection you can:

- watch TV channels and videotapes
- · record TV channels
- record one TV channel while watching the same or another channel
- record (dub/edit) from one VCR to the other VCR while watching a videotape

### You will need:

- · two coaxial cables
- two sets of standard A/V cables (If VCR1 has S-video, you can use an S-video cable between VCR1 and the TV instead of the standard video cable. See "Note Regarding Picture Quality" on page 7.)

#### Note:

Do not connect the same VCR to both the OUT <u>and</u> the IN connections on the TV at the same time.

To record (dub/edit) from VCR 1 to VCR 2, the TV must select VIDEO 1 (see page 16), and VCR 2 must select LINE IN.

## Using the remote control

## Preparing the remote control for use

Your TV remote control can operate your TV and most cable converter boxes, satellite receivers, VCRs, DVD players, and HTIBs (home theater in a box), even if they are different brands.

## If you have a Toshiba device:

Your TV remote control is preprogrammed to operate most Toshiba devices. See page 14.

## If you have a non-Toshiba device or a Toshiba device that the remote control is not preprogrammed to operate:

You can program the TV remote control so it will operate the other device. See pages 12-14.

## Installing the remote control batteries

1 Remove the battery cover from the back of the remote control.

#### Caution:

Dispose of batteries in a designated disposal area. Do not throw batteries into a fire.

Do not mix battery types or combine used batteries with new ones.

Remove dead batteries immediately to prevent battery acid from leaking into the battery compartment.

If you do not intend to use the remote control for a long time, remove the batteries.

2 Install two "AA" size batteries, making sure to match the + and – signs on the batteries to the signs on the battery compartment.

#### Note:

If your Toshiba TV remote control does not operate all the features of your other device, use the original remote control for that device.

3 Reinsert the battery cover in the remote control until the tab snaps.

## Location of controls on TV and remote control

For details on the use of each control, refer to pages in brackets.

## **TV** front panel

## Programming the remote control to operate a cable converter box, satellite receiver, VCR, DVD player, or HTIB (home theater in a box)

Your Toshiba TV remote control is preprogrammed to operate most Toshiba devices. To program your TV remote control to operate a non-Toshiba device (or a Toshiba device that it is not preprogrammed to operate), follow the steps below. For details on using the remote control to operate the device, see page 14.

- 1 In the remote control code table (below and on the next page), find the code for your device. If more than one code is listed, try each one separately until you find one that works.
- 2 Set the **Device Switch** to the type of device you are programming the remote control to operate—**CBL/SAT** (for a cable converter box or satellite receiver), **VCR** (for a VCR or TV/VCR combo), or **DVD** (for a DVD player or HTIB [home theater in a box]).
- 3 While holding down **RECALL**, press the **Channel Number** buttons to enter the 3-digit code for your device.
- 4 To test the code, turn on the device, point the remote control at it, and press **POWER**.
  - -If the correct code was entered, the device will turn off.
  - -If the device does not respond, repeat steps 1–4 using another code.
  - -If the device does not respond to another code, you will need to use the remote control that came with the device.
- **5** Remember to set the **Device Switch** back to **TV** to control the TV.
- **6** For future reference, write down the code(s) you used:

DEVICE	CODE	DEVICE	CODE

#### Note:

Every time you change the batteries, you will need to reprogram the remote control.

Some newer VCRs respond to either of two codes. These VCRs have a switch labeled "VCR1/VCR2." If your VCR has this kind of switch and does not respond to the codes for your VCR brand, set the switch to the other position ("VCR1" or "VCR2") and reprogram the remote control.

### Remote control codes

In some cases you may not be able to operate your device with the TV remote control. Your other device may use a code that is not recognized by the TV remote control. If this happens, you will need to use the remote control provided with the device.
